"documents" (also called "pages"). Such documents are produced in Hypertext Markup Language ("HTML") which is a reference to a type of programming language used to produce documents with commands or "tags" therein. The tags are codes which define features and/or operations of the document such as fonts, layout, imbedded graphics and hypertext links. HTML documents are processed and read through use of a computer program referred to as a "browser". The tags tell the browser how to process and control what is seen on a screen and/or is heard on speakers connected to the computer running the browser when the document is processed. HTML documents may be transmitted over a network through the Hypertext Transfer Protocol ("HTTP"). The term "Hypertext" is a reference to the ability to embed links into the text of a document that allow communication to other documents which can be accessed in the network.

Remarks

Applicants have amended the Specification to include information regarding background art, including the reference cited in the corresponding PCT application. Applicants are also submitting herewith their Information Disclosure Statement, which cites the background art now referred to in the text. This background includes the standard definitions of "TCP/IP", "HTML", "HTTP" and "browser" known to those skilled in the art as shown by the Glossary of the text "The Internet For Dummies", 4th Edition, which is enclosed. No new matter is added to the disclosure of the invention as a result of this Amendment.

2

Examination and favorable consideration of the Application is requested.

Respectfully submitted,

Ralph E. Jocke   Reg. No. 31,029
231 South Broadway
Medina, Ohio 44256
